### **Where to Use a DRICore® Subfloor....**

*If there's a living space on concrete, chances are, it's cold, hard and damp. The DRICore subfloor system ([www.dricore.com](http://www.dricore.com)) is engineered to be the perfect concrete floor companion in basements and on grade-level concrete slabs.*

- Raised design creates warmer, drier floors
- Natural 4-way air flow dries up condensation
- Eliminates moisture "wicking" and musty odors
- Comfortable, resilient wood core
- Modular for quick, easy, one-step installation

*Comfort is more than a beautiful thing. In fact, you may not be able to see it, but you'll know when it's there. That's why there are so many spaces that will benefit from a DRICore subfloor. Here's just a sampling of ideas for your consideration:*

#### **Basements/Walkout Lower Levels**

- Rec room
- Sewing room
- Office
- Cedar closet
- Workshop
- Game room
- Bedroom
- Home theater
- Storage room
- Dance practice floor
- Laundry room
- Hobby/craft room
- Exercise room
- Wine cellar
- Playroom
- Studio

More . . .

**Elsewhere**
